

A Same area, different contrast

Wide: EBSD pattern-sharpness map

B Different instrument and magnification

Wide: Light optical, bright-field

C A small field inside a large one

Wide: SEM, secondary electrons

Narrow: SEM, backscattered electrons
99 % of the wide image's area
47 annotated points

Narrow: EBSD orientation map
25 % of the wide image's area
54 annotated points

Narrow: SEM, backscattered electrons
4.9 % of the wide image's area
19 annotated points
