

A Same area, different contrast

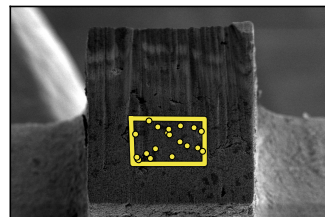

Wide: EBSD pattern-sharpness map

B Different instrument and magnification

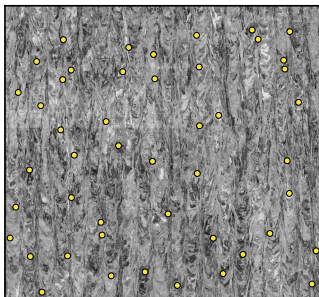

Wide: Light optical, bright-field

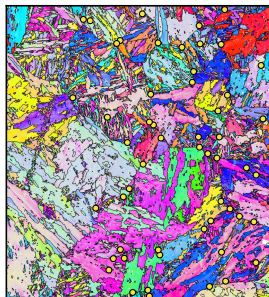

C A small field inside a large one

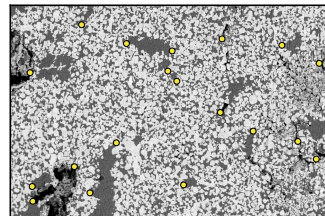

Wide: SEM, secondary electrons

Narrow: SEM, backscattered electrons
25% of the wide image's area, 47 annotated points

Narrow: EBSD orientation map
25% of the wide image's area, 54 annotated points

Narrow: SEM, backscattered electrons
4.9 % of the wide image's area, 19 annotated points
