

Appearance: same area, same microscope, different detector

A MatchAnything-RoMa: error 2043 px the narrow image's area, as the wide image records it

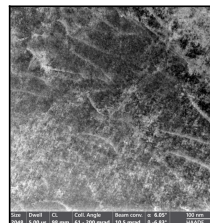

wide: STEM, dark-field 4

2048 x 2192 wide-image pixels

narrow image (97 % of the wide image's area)

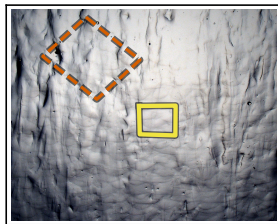

STEM, annular dark field
2048 x 2192 px

Field of view: the narrow image covers under 2 % of the wide one

B MatchAnything-RoMa: error 623 px

the narrow image's area, as the wide image records it

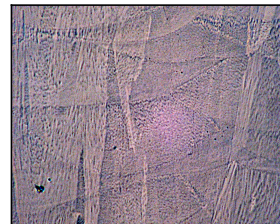

wide: Light optical, bright-field

239 x 195 wide-image pixels

narrow image (1.9 % of the wide image's area)

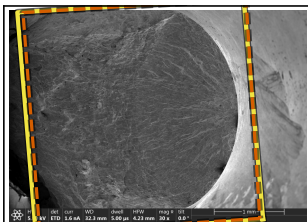

Light optical, bright-field
1729 x 1379 px

Forgetting: a pair the released matcher registers, before and after fine-tuning

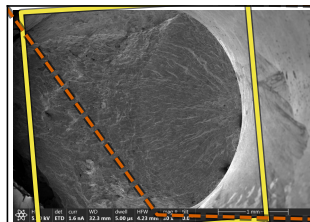

C MatchAnything-RoMa: error 6 px

after fine-tuning: error 473 px

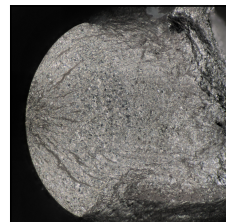

narrow image (80 % of the wide image's area)

wide: SEM, secondary electrons

same wide image

Light optical, extended focus
3769 x 3746 px

— true outline (ground truth) — where the matcher put it
