

Appearance: same area, same microscope, different detector

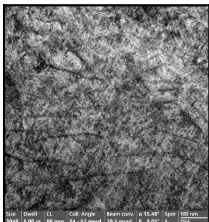

A MatchAnything-RoMa:
error 2043 pixels

the narrow image's area, as the
wide image records it

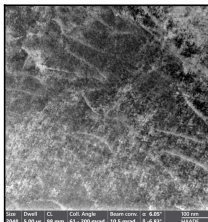

narrow image (97 % of the wide
image's area)

wide: STEM, dark-field 4

2048 x 2192 wide-image pixels

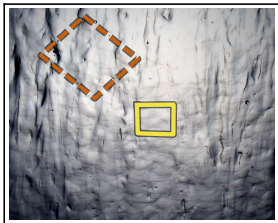

STEM, annular dark field
2048 x 2192 pixels

Field of view: the narrow image covers under 2 % of the wide one

B MatchAnything-RoMa:
error 623 pixels

the narrow image's area, as the
wide image records it

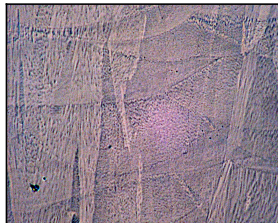

narrow image (1.9 % of the wide
image's area)

wide: Light optical, bright-field

239 x 195 wide-image pixels

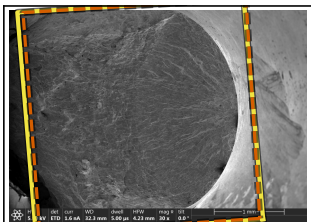

Light optical, bright-field
1729 x 1379 pixels

Forgetting: a pair the released matcher registers, before and after fine-tuning

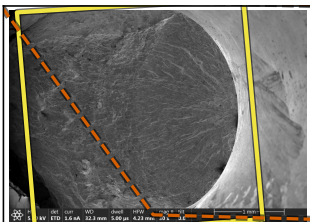

C MatchAnything-RoMa:
error 6 pixels

after fine-tuning:
error 473 pixels

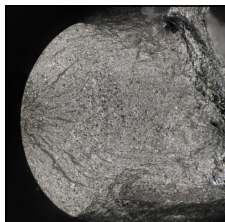

narrow image (80 % of the wide
image's area)

wide: SEM, secondary electrons

same wide image

Light optical, extended focus
3769 x 3746 pixels

— true outline (ground truth) - - - where the matcher put it
